Re: Morse and Summit Roads Waterline Extension and Booster Pumping Station
Southwest Licking Community Water & Sewer District
Jersey Township, Licking County, Ohio
Notification of Upcoming Field Work

Dear Property Owner:

The Southwest Licking Community Water and Sewer District (District) is proposing to install a new water main along portions of Summit Road, Morse Road, and Putnam Road, as well as a new booster pumping station along Summit Road. The main intent of the proposed project is to provide a redundant water supply, or “loop” to the already installed Worthington Road water main. The District has selected Strand Associates, Inc. to complete the engineering services required to design and construct the new water main and new booster pumping station.

Strand Associates, Inc. and their subconsultants will be performing fieldwork and developing plans for this project. Accordingly, we wish to advise you that it will likely be necessary for personnel from subconsultant Smart Services, Inc. to enter upon your property over the next several weeks to obtain field data needed in connection with this project. These property entries will generally occur near the right-of-way line along the road. Personnel may be using common survey equipment or other methods to collect their field data. Sections 6119.34 of the Ohio Revised Code authorize such entries, but also require that reimbursement be made for any actual damage resulting from such work. Personnel are aware of the desire to preserve private property and public lands and will make every effort to leave all properties in the same condition as when they arrived. If at any time you feel that our representatives have not given proper attention to private property, please notify:

Patrick Karnes, PE
Strand Associates, Inc. Project Manager
614-835-0460 Ext 5019

Any survey stakes or markers placed during this time do not indicate proposed work limits and will only be for the purpose of marking existing property locations, utilities, and survey control points. We ask that you do not disturb any survey markers. Please note that personnel from Smart Services, Inc. will not be able to give any information or answers to your questions regarding the project. They will simply be collecting survey data within the project area. We appreciate your cooperation and assistance so that this worthwhile project can be completed at the earliest possible date.

Sincerely,
SMART SERVICES, INC.
